Colombo, Sri Lanka | muralitharan.sample@example.com | +94 77 123 4567

LinkedIn: linkedin.com/in/muralitharan-sample | GitHub: github.com/muralitharan-sample | Portfolio: muralitharan.dev

PROFESSIONAL SUMMARY

Software Engineer with 4+ years of experience building web applications, backend APIs, cloud-based systems, and AI-enabled solutions. Strong experience in Python, FastAPI, React, MongoDB, Docker, AWS, and CI/CD. Experienced in cross-functional teamwork, client communication, production troubleshooting, mentoring junior developers, and owning features from requirement gathering through deployment.

TECHNICAL SKILLS

Programming	Python, JavaScript, TypeScript, Java, SQL
Backend	FastAPI, Flask, Node.js, REST APIs, WebSockets
Frontend	React, HTML, CSS, Tailwind CSS
Databases	MongoDB, PostgreSQL, MySQL, Redis
Cloud & DevOps	AWS, Docker, GitHub Actions, CI/CD, Nginx, Linux
AI / ML	PyTorch, OpenCV, YOLO, Scikit-learn, Pandas, NumPy
Tools	Git, GitHub, Postman, Jira, VS Code, Figma

PROFESSIONAL EXPERIENCE

Senior Software Engineer

ABC Technologies Pvt Ltd - Colombo, Sri Lanka | Jan 2025 - Present

- Design and develop scalable APIs using Python and FastAPI, and frontend applications using React and TypeScript.
- Design MongoDB/PostgreSQL schemas, deploy with Docker and AWS, review pull requests, and mentor junior engineers.
- Reduced API response time by ~35% through query optimization and Redis caching.
- Designed a reusable authentication module used across three internal applications.
- Led a four-developer team on a recruitment platform and resolved a production issue affecting ~2,000 daily users.
- Introduced automated testing and CI/CD with GitHub Actions.
- Technologies: Python, FastAPI, React, TypeScript, MongoDB, PostgreSQL, Redis, Docker, AWS.

Software Engineer

Digital Solutions Lanka Pvt Ltd - Colombo, Sri Lanka | Jul 2022 - Dec 2024

- Developed REST APIs with Flask/FastAPI, React components, third-party integrations, and SQL/MongoDB queries.
- Worked with QA in Agile sprints, code reviews, defect resolution, and technical documentation.
- Built an automated reporting module that reduced manual reporting by ~10 hours per week.
- Migrated a legacy Flask service to FastAPI and helped shift services to Docker-based deployment.
- Technologies: Python, Flask, FastAPI, React, JavaScript, MongoDB, MySQL, Docker, AWS.

Software Engineering Intern

Innovate Software Labs - Kandy, Sri Lanka | Jan 2022 - Jun 2022

- Developed REST APIs, fixed frontend/backend bugs, wrote unit tests, and assisted with database implementation.
- Technologies: Python, Flask, JavaScript, React, MySQL, Git.

PROJECTS

TalentVerifyAI - AI Recruitment Platform

GitHub: github.com/muralitharan-sample/talentverify-ai

AI-assisted recruitment platform with CV parsing, candidate profiles, job-specific scoring, recruiter dashboards, interview evaluation, GitHub analysis and RBAC. Designed FastAPI architecture, MongoDB collections, Gemini-based structured CV extraction, candidate-job matching, scoring logic, Docker deployment and CI/CD. Technologies: React, FastAPI, Python, MongoDB, Gemini API, Docker, GitHub Actions.

Smart Attendance and Classroom Monitoring System

GitHub: github.com/muralitharan-sample/smart-classroom

Computer vision system for classroom student counting and cloud occupancy reporting. Collected and annotated data, trained YOLO models, developed inference and FastAPI services, synchronized cloud data, and containerized deployment. Technologies: Python, YOLO, PyTorch, OpenCV, FastAPI, Docker, AWS. Internal validation accuracy: ~92%.

E-Commerce Microservices Platform

GitHub: github.com/muralitharan-sample/ecommerce-microservices

Experimental microservices backend with authentication, products, orders, payments and notifications. Implemented auth/order services, Redis caching, Docker Compose, CI pipeline and PostgreSQL. Technologies: Python, FastAPI, PostgreSQL, Redis, Docker, AWS.

Employee Leave Management System

GitHub: github.com/muralitharan-sample/leave-management

Internal web application for leave requests and manager approvals. Technologies: React, Node.js, MongoDB, Docker.

GITHUB EVIDENCE

Profile: github.com/muralitharan-sample

Selected repositories: talentverify-ai, smart-classroom, ecommerce-microservices, fastapi-auth-template.

Evidence: REST APIs, MongoDB and Gemini integration, Docker, README documentation, unit tests, YOLO inference code, PostgreSQL/Redis, microservice architecture, JWT authentication, feature branches, pull requests and issue tracking.

EDUCATION

Bachelor of Science Honours in Software Engineering

University of Moratuwa, Sri Lanka | 2018 - 2022 | GPA: 3.62 / 4.00

Relevant modules: Software Engineering, Data Structures and Algorithms, Database Systems, Artificial Intelligence, Machine Learning, Cloud Computing, Computer Networks, Software Architecture.

Final Year Project: AI-Based Traffic Monitoring and Vehicle Detection System.

CERTIFICATIONS

- AWS Certified Cloud Practitioner - Amazon Web Services | Mar 2025 | Credential ID: SAMPLE-AWS-001
- Microsoft Azure Fundamentals (AZ-900) - Microsoft | Oct 2024 | Credential ID: SAMPLE-AZ900-002
- Docker Foundations Professional Certificate - Docker | Jun 2024
- Machine Learning Specialization - Coursera / DeepLearning.AI | Dec 2023

SOFT SKILLS WITH EVIDENCE

Communication	Presented architecture and technical progress during client meetings and sprint reviews.
Problem Solving	Identified inefficient MongoDB queries as the root cause of a production performance issue.
Ownership	Owned authentication and authorization from initial design through production release.
Teamwork	Collaborated with developers, QA, designers, product managers and DevOps engineers.
Adaptability	Learned FastAPI and Docker during a migration project and helped migrate existing services.
Feedback Handling	Improved API architecture following senior code-review feedback and reused those practices elsewhere.
Critical Thinking	Recommended Redis caching instead of increasing server capacity after analyzing repeated DB requests.
Leadership	Mentored two junior engineers and coordinated module development activities.

LANGUAGES

Tamil	Fluent - Speaking, Reading and Writing
Sinhala	Fluent - Speaking and Reading; professional working proficiency in writing
English	Fluent - Speaking, Reading and Writing; professional working proficiency

Uses English for technical meetings, documentation and emails; communicates with local customers in Tamil and Sinhala.

ADDITIONAL INFORMATION

Notice Period: 1 Month

Preferred Roles: Software Engineer, Senior Software Engineer, Backend Engineer, Full Stack Engineer, AI Software Engineer

Preferred Working Environment: Hybrid, Remote, On-site

References: Available upon request.
